This mod tune morph coefficients for heroine

It's only works if the SHOOTING SKILLS FULLY TRAINED

Setup:

use Catspaw's GFWL emu

put DLC folder to Fable 3 game directory

use this to add code that train shooting skills to full (or train it just shooting without this cheat)

Curious as to what this mod does. Is it just changing how the hero looks when thin and fat?

Also unrelated but how would I use

Toggle Spoilerif Experience.Get(QuestManager.HeroEntity,

```
EExperienceType.EXPERIENCE_SKILL) < 252500 then
```

```
  Experience.Modify(QuestManager.HeroEntity, EExperienceType.EXPERIENCE_SKILL, (252500
```

```
- Experience.Get(QuestManager.HeroEntity, EExperienceType.EXPERIENCE_SKILL)), false)
```

```
  Debug.SetHeroSkill(1.0)
```

```
end
```

to also max out magic aura and strength?

Yes, it changes the Morphs (the "bone" positions and densities) like I was planning to do with my big breast mod (in another thread). It's pretty fun to get in there and play with. I'll try and explain it on my thread if you'd like.
