\ai\combatstyles

with these scripts, you can dramatically change the behavior of the AI in battle

for example  
want a more complex competition?  
you can make every your strike has been blocked, and each shot will dodged

\miscellaneous  
here mainly enums  
but those two are interesting  
combatbalance.lua  
herolocomotionstates.lua

This is fantastic. Grabbing all the low hanging fruit.

I attached the file to your post for you.  
The debug comments at the end to check if they loaded was a nice touch.

Just wanted to say, standard Windows extraction thingy doesn't work on that .zip. I had to pull the files out with 7zip.

update  
some fixes for AI scripts  
I copy-pasted "EvadeShotsData" for "EvadeAnimations" in  
ai\combatstyles\banditcombatstyles.lua  
ai\combatstyles\minioncombatstyles.lua  
and a little typo in  
miscellaneous\herolocotionstates.lua

Keshire, I have attached file, so there is no need to do anything
