Hello everyone,

I'm looking to add a new custom weapon in Fable 3 on PC, without replacing the existing weapons. I already have a 3D model ready, and I'd like to know how to add it into the game so it appears in my inventory, in the armory.

When I say "new weapon," just copy existing weapons and adding my model to my new sword is enough! Could someone help me? It's a small dream I've never managed to achieve, and it would be so cool! Thank you!

OR MAYBE? If I have two copies of the same weapon in my inventory and I want to change the model of just one of them without affecting the other, maybe that's possible, and it would be simpler and faster?

Could someone guide me with a step-by-step tutorial or some tips for adding a new sword to get started? Thank you!

I have Discord.

Is it possible ?
